Who are we? Some of the Connolly family.....

Connolly's
RED MILLS
SINCE 1908

Pure Nutrition

At Connolly's RED MILLS we have been producing animal feeds since 1908. Five generations of our family business have been intimately involved in developing our unique concept called PURE NUTRITION.

Our philosophy is simply PURE NUTRITION - the best of natural ingredients for optimum digestion, well being and health.

RED MILLS

A close-up photograph of a woman with blonde hair, seen from the side, holding a small, grey, handheld electronic device against the eye of a dark brown horse. The woman is wearing a blue shirt and a small earring. The horse's eye is large and dark, and it is looking towards the camera. The background is dark and out of focus.

Quality Control

Incoming Materials

Material	Sampling Frequency & Method	Testing Frequency	Tests	Specification	Extra Requirements
Bulk Feed Ingredients (excluding bulk minerals and liquids)	1 per load Sample is taken from top of load by using a clean scoop and the sample is then put into a clean plastic sample bag.	Every sample (in the case of incoming consignments of feed ingredients every 10 samples may be bulked up, mixed and 1 composite sample taken for testing)	Visual Assessment Protein(NIR) Oil(NIR) Fibre(NIR) Ash(NIR) Moisture(NIR) MSD Non-GM quick test (Non-GM Soyabeans)	As per specification Must be negative for prohibited substances Negative for GM material (Non-GM Soyabeans)	Retain sample for 4 months. After 4 months samples are disposed of by a licensed waste contractor.
		1 sample at random every 6 months	Heavy metals	In accordance with E.U. legislation	
		1 sample of Maize and Soyabeans every quarter	PCR test	GM material <0.9%	

Doping Control

WCAS announces the purchase of a new liquid chromatography-quadrupole mass spectrometer (LC-MS/MS) system, a [Varian 1200L](#).

The system has the following features:

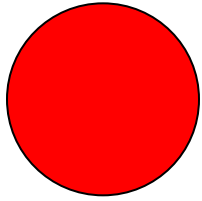

- triple quadrupole for MS/MS
- atmospheric pressure ionization source (APCI)
- electrospray source (ESI)
- +/- mass spectrometer
- curved collision cell
- 10-1500 amu mass range
- 10^5 linear dynamic range
- fg-pg sensitivity for model compounds

The HPLC system includes a photodiode array detector.

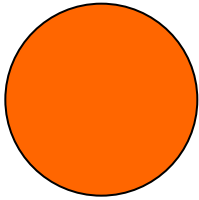

The mass spectrometer with curved collision cell is shown below:
